

Final Flight Information List (FFIL)

Last Modified on 06/05/2026 9:33 am MDT

The Final Flight Information List (FFIL)(passenger manifest) may be retrieved electronically on the FlyTab. The FFIL displays all passengers confirmed on the flight, any Special Service Requests (SSRs), seat assignments, identifies if seat was paid by displaying a green check mark, and priority codes of positive space and non-revenue passengers. Additionally, the FFIL will indicate a Frontier Airlines World MasterCard holder, Elite customers (Platinum and Diamond), and those with a birthday on the day of departure.

Retrieving the Final Flight Information List on the FlyTab is optional and waiting on the list to load will not delay a flight.

The Final Flight Information List may be generated once the Customer Service Agent has put the flight in Closed status which is done once all passengers have been reconciled.

To retrieve the Final Flight Passenger List on the FlyTab:

1. Open the **Browser** icon and click on the **MyFrontier** icon.
2. Enter your Frontier Active Directory username and password.
3. On the MyFrontier.org home screen, select the **My Links** tab and select **Corporate Applications**.
4. Scroll down to the Inflight Experience sections and click on **Final Flight With Seat Paid Info**.
5. Enter the **Flight Number, Origin**, and if not populated, the **Departure Date**. This list may take a few minutes to load.
6. Once the Final Flight Information List (FFIL) is displayed, keep the tab open to be able to view throughout the duration of the flight.
