

Accessing DocuNet Mobile Viewer

Last Modified on 10/05/2023 12:40 pm MDT

When you start the DocuNet application for the first time you will need to register with Vistair's systems so the correct documents can be delivered to you. A strong Wi-Fi connection is required to register the application.

On the registration screen, enter the following:

- **Airline (ICAO):** FFT
- **Username:** Frontier Active Directory (AD) username (not email)
- **Device Type:** Personal

Once you have successfully entered your details, the application will initialize itself and you will be presented with the opening view containing Frontier's introduction screen.
